ECO-FRIENDLY SOLUTIONS

ÇEVRE DOSTU ÇÖZÜMLER / SOLUTIONS ÉCOLOGIQUES

We work hard to minimize the negative impact to our environment from supply to production, from packaging to logistics. We prefer adaptable, organic and innovative materials during the design phase. We mainly use wood, metal, marble, fabric and leather. We prefer to supply our raw materials with international ecologic certificates.

We create long living products thanks to our developed production techniques and detail oriented designs. With our dissambling systems, we can adapt different products with various leg types to increase efficiency in manufacturing. We protect wood materials with UV-protected organic coatings against outdoor impacts. We manufacture our chairs with changeable covers. We rather choose washable fabrics produced by Safefront ecological method and use non-phthalate materials.

We care for the environment and support local production by carrying out all the production activities in Istanbul. Every year, we distribute our goods to projects in different continents such as Europe, U.S.A, Scandinavia, Africa, Arabia and Russia. Meanwhile, we use a compact dissambling packaging system to protect the consumer and the manufacturer from the extra cost of packaging and transportation.

We have implemented our ecology policy in our own showroom. We completed our architectural design with a gallery space and thanks to this, we save heat and electricity. Also, we communicate inside the showroom at the highest level.

ECO-FRIENDLY SOLUTIONS

ÇEVRE DOSTU ÇÖZÜMLER / SOLUTIONS ÉCOLOGIQUE

Tedarikten üretime, paketlemeden lojistiğe kadar her aşamada çevremiz üzerindeki olumsuz etkileri en aza indirmek için çalışıyoruz. Tasarım aşamasında adapte olabilen, organik ve yenilikçi malzemeler tercih ediyoruz. Ana malzemelerimiz; ahşap, metal, mermer, kumaş ve deridir. Hammaddelerimizin çevreci sertifikalara sahip olmasına önem veriyoruz.

Gelişmiş üretim yöntemlerimiz ve detay odaklı tasarımlarımız ile ürünlerimizin ömrünü uzatıyoruz. Demonte sistemlerimiz sayesinde farklı ayaklar ile farklı ürünleri adapte ederek üretimde ve uygulamada verimi artırrıyoruz. Ahşap malzemeleri dış mekan etkilerine karşı UV korumalı organik kaplamalar ile koruyoruz. Sandalyelerimizi kılıfları değiştirilebilir şekilde üretiyoruz. Safefront isimli ekolojik yöntem ile üretilen silinebilir ve fitalatsız kumaşlar tercih ediyoruz.

Tüm üretimlerimizi İstanbul'da gerçekleştirerek çevreyi önemsiyor, yerli üretimi destekliyoruz. Her yıl Avrupa, Amerika, İskandinavya, Afrika, Arapistan ve Rusya gibi farklı kıtlardaki ülkelerden gelen projeler ile ürünlerimizi dünyaya dağıtıyoruz. Bu sırada, kompakt bir ambalajlama sistemi ve demonte paketlenen ürünler sayesinde ekstra yol ve paket masrafından tüketiciyi ve üreticiyi koruyoruz.

Çevreci politikamızı kendi mağazamızda da uyguluyoruz. Mimari tasarımımızdaki galeri boşluğu sayesinde ısından tasarruf ediyor ve mağaza içi iletişimini en üst düzeyde tutuyoruz.

Nous nous efforçons de minimiser l'impact négatif sur notre environnement de l'approvisionnement à la production, de l'emballage à la livraison. Nous préférons des matériaux adaptables, organiques et innovants lors de la phase de design. Nous utilisons principalement le bois, le métal, le marbre, le tissu et le cuir. Nous donnons de l'importance à la certification environnementale de nos matières premières.

Avec nos méthodes de production avancées et à nos designs minutieux, nous prolongeons la durée de vie de nos produits. Grâce à nos systèmes de désassemblage, nous adaptons différents produits avec des pieds différents et augmentons l'efficacité de la production et de l'application. La mousse moulée de chaise peut être réutilisé en changeant la housse de chaise. Nous appliquons aux bois des matières organiques protégées contre les effets des rayons UV. Nous préférons les tissus nettoyables nommés Safefront fabriqués selon une méthode écologique et aussi, sans phthalates.

En fabriquant à Istanbul, nous maintenons le marché national au premier plan. Chaque année, nous augmentons notre capacité d'exportation en ajoutant à notre portefeuille des projets de pays de différents continents, tels que l'Europe, l'Etats-Unis, la Scandinavie, l'Afrique, le Kenya, l'Arabie Saoudite et la Russie. Nous protégeons également le consommateur et le fabricant des coûts supplémentaires d'emballage et de transport grâce aux produits démontés et au système d'emballage compact.

Nous avons également mis en œuvre notre politique d'espaces transparentes dans notre propre magasin. L'espace de galerie de notre design architectural permet d'économiser de la chaleur et de maintenir la communication en magasin au plus haut niveau.
